Project Title: El Clasico

I'd like to build this project as multiple pages with a typical navigation bar across the top of the page. The different pages would be home, history, statistics, records, and notable people. The different pages could be themed by each club's colors. This would help organize the information about the clubs on the pages.

Home- introduction of the teams and

History- a brief history of the rivalry especially the political aspect of the rivalry

Statistics- Notable statistics about the rivalry such as wins, loses, draws, goals scored, competitions won etc

Records- Notable records such as most goals, appearances, assists, clean sheets, red cards, etc

Notable people- List of people (mostly or entirely players) that are important to the rivalry record holders, people that played for both clubs, etc

Sources- This will just list all of the sources that the site uses including wikipedia and images.
